

# A GUIDE TO THE TYPES OF SUCCULENTS ID CARDS

## IDEAL LIGHT

Full Sun: ☀

This means the plant likes a lot of light and can handle some direct sunlight. This does not mean it can handle heat -- that varies from succulent to succulent. Generally keep succulents shaded in the afternoon when temperatures are hottest.

If you are growing succulents indoors, “full sun” succulents will need a grow light running several hours per day in order to prevent stretching and maintain color.

Partial Sun: ☁

These succulents like quite a bit of sun, but don't generally want direct sun all day. Still protect them from heat and avoid late afternoon light. Morning light is ideal.

Indoors, you'll want to use a grow light a few hours a day to prevent stretching and maintain color.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/TOSLIGHT**

## IDEAL LIGHT

Shade: 

Avoid giving these succulents direct sunlight. Morning sun may be ok, but not for very long.

Indoors, you may want to supplement with a grow light for a couple hours a day to maintain really compact shape.

Indoor: 

While all succulents can technically be grown indoors, succulents with this icon will grow well without a grow light. You may notice a little stretching, but not as much as a full sun succulent.

If you don't have grow lights, consider getting a succulent with this icon for your indoor garden.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/TOSLIGHT**

## WATER

Watering frequency is affected by a number of factors including (but not limited to): general climate, temperature, soil type, pot size, pot material, air circulation, and more.

To help you understand the needs of succulents relative to each other, the cards have a “drop system” to indicate how much water they like.

I always recommend following the “Soak and Dry” method for watering to ensure your succulents grow healthy roots.

If you are not familiar with this method, please visit:

[succulentsandsunshine.com/toswater](http://succulentsandsunshine.com/toswater)

## DROP SYSTEM MEANINGS

You'll find these succulents are extremely drought tolerant, very low maintenance and should be watered very infrequently. They are prone to rot, especially if watered very often during dormancy.

**FOR MORE DETAILS PLEASE VISIT:  
[SUCCULENTSANDSUNSHINE.COM/TOSWATER](http://SUCCULENTSANDSUNSHINE.COM/TOSWATER)**

## DROP SYSTEM MEANINGS

These succulents are generally prone to rot and should be watered infrequently, waiting several days or even a week or two after the soil is dry.

They can be watered more often than their “1 drop” cousins, but can still go long periods of time without water.

This is what we consider an “average” succulent. Water a couple days after the soil is completely dry.

Waiting longer between watering will allow your succulents to become more drought tolerant and have strong healthy root systems. But waiting too long may cause them to grow very slowly.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/TOSWATER**

## DROP SYSTEM MEANINGS

While most succulents can go long periods of time without water, succulents in this group like to be watered pretty frequently.

Ideally you'll wait until the soil has dried out completely, but may find they need to be watered a bit sooner.

These succulents are really not like other succulents at all. There are very few of them, but they need very frequent water or high humidity in order to thrive.

Combining these succulents in arrangements with 2 and 3 drop succulents will prove to be a challenge and they may not last long.

### NOTE

The drop system is a guideline to help you find succulents with similar water needs and get a general idea for how to water. You may find that some succulents need adjustments to grow well in your climate.

**FOR MORE DETAILS PLEASE VISIT:  
[SUCCULENTSANDSUNSHINE.COM/TOSWATER](http://SUCCULENTSANDSUNSHINE.COM/TOSWATER)**

## MINIMUM TEMPERATURE

Cold temperatures can easily damage succulents. Each species has different temperatures it can handle.

Most succulents can handle these temperatures for a few days before you'll start to see problems.

Ideally, you'd keep them above this temperature.

Larger plants will tolerate the cold more easily than smaller plants. Succulents in the ground will tolerate colder temperatures better than succulents in pots.

If you are concerned about specific plants during a cold spell, you can either bring them in or cover with frost cloth. This is a temporary fix and won't generally allow them to tolerate temperatures below their normal rating.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM**

## DORMANCY

Dormancy is a period of time when succulents grow more slowly or almost stop growing. This generally happens when temperatures are hotter or colder than succulents like.

Succulents listed as summer dormant will grow primarily during cool times of year.

Winter dormant succulents will grow primarily during warm times of year.

Generally you'll want to reduce watering during dormancy periods and follow the soak and dry approach when the succulents are actively growing.

Indoor succulents rarely experience dormancy unless you force it by changing the temperature dramatically along with the amount of light they receive.

Without forcing dormancy indoors, you may still notice a change in growing speed throughout the year, though it likely won't correspond to the traditional dormancy cycles like outdoor succulents.

**FOR MORE DETAILS PLEASE VISIT:  
[SUCCULENTSANDSUNSHINE.COM/TOSDORMANCY](http://SUCCULENTSANDSUNSHINE.COM/TOSDORMANCY)**

## ADDITIONAL NOTES

If you'd like additional information about the other sections of the cards, we'd invite you to visit the website for more descriptions.

SUCCULENTSANDSUNSHINE.COM/TOSDORMANCY**

ACANTHOCEREUS  
TETRAGONUS  
“FAIRY CASTLE CACTUS”

**IDEAL LIGHT:** ☼

**WATER:** ♦♦♦♦♦

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

6 ft (1.8 m) tall

**PROPAGATION:**

Cuttings, offsets, and seeds

**ADDITIONAL NOTES**

Generally non-toxic to pets and people.

“Fairy Castle Cactus” rarely blooms. It can take years before it is mature enough to do so. However, when it does bloom, it produces white or yellow flowers.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/FAIRY**

ADROMISCHUS CRISTATUS  
“CRINKLE-LEAF PLANT”

**IDEAL LIGHT:** ☼

**WATER:** ♦♦♦○○

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE ROSETTE SIZE:**

18 in (45 cm) tall | 24 in (61 cm) wide

**PROPAGATION:**

Cuttings, leaves, and seeds

**ADDITIONAL NOTES**

Can be toxic to pets and people.

It grows a tall, green stalk from which a white flower blooms in the fall.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/CRINKLE**

ADROMISCHUS MACULATUS  
‘CALICO HEARTS’

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** ⚡⚡💧

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

8 in (20 cm) tall | 8 in (20 cm) wide

**PROPAGATION:**

Cuttings, leaves

**ADDITIONAL NOTES**

Can be toxic to pets and people.

Watch for white, tube-shaped flowers in the summer, although it rarely blooms indoors.

It is a great succulent for beginners.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/CALICO**

**AEONIUM CANARIENSE**  
**"GIANT VELVET ROSE"**

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** ⚡⚡💧

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE ROSETTE SIZE:**

12 in (30 cm) tall | 8 in (20 cm) wide

**PROPAGATION:**

Cuttings, offsets, seeds

**ADDITIONAL NOTES**

Generally non-toxic to people and pets.

This tall, bright green succulent has leaves that turn red in full sun.

This succulent is monocarpic, meaning it will die after it flowers. When it does bloom, watch for yellow flowers.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/VELVETROSE**

AEONIUM 'KIWI'

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** ⚡⚡💧

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Summer dormant

**MATURE ROSETTE SIZE:**

5 in (12 cm) wide

**PROPAGATION:**

Cuttings, seeds

## **ADDITIONAL NOTES**

Generally non-toxic to pets and people.

‘Kiwi’ has green and yellow rosettes with pink around the edges when given enough sunlight.

This succulent is monocarpic, meaning it will die after blooming. When it does bloom, watch for yellow flowers.

‘Kiwi’ bruises easily.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/KIWI**

**AEONIUM 'MARDI GRAS'**

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** ⚡💧💧

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE ROSETTE SIZE:**

12 in (30.5 cm) tall | 12 in (30.5 cm) wide

**PROPAGATION:**

Cuttings

## **ADDITIONAL NOTES**

Can be toxic to pets and people.

When grown in full sun or in cooler temperatures, the yellow and green striped leaves turn bright pink and lime green.

This succulent is monocarpic, meaning it will die after blooming. When it does bloom, watch for flowers in the spring or summer.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/MARDIGRAS**

AEONIUM 'SUNBURST'

**IDEAL LIGHT:** ☼ ☁

**WATER:** ⚡⚡💧

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Summer dormant

**MATURE ROSETTE SIZE:**

18 in (46 cm) tall | 24 in (61 cm) wide

**PROPAGATION:**

Cuttings

## **ADDITIONAL NOTES**

Generally non-toxic to pets and people.

Its leaves are white and green, with pink edges that become more noticeable in full sun.

This succulent is monocarpic, meaning it will die after blooming. When it does bloom, watch for white flowers.

‘Sunburst’ bruises easily.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/SUNBURST**

**AEONIUM URBICUM**  
**“SALAD BOWL”**

**IDEAL LIGHT:** ☼ ☁

**WATER:** ⚡⚡💧

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

12 in (30.5 cm) tall | 36 in (91 cm) wide

**PROPAGATION:**

Cuttings

## **ADDITIONAL NOTES**

Generally non-toxic to pets and people.

This bright green succulent has a large rosette. The tips of its leaves blush red when happily stressed.

It is monocarpic, meaning it will die after blooming. Watch for off-white flowers in the spring.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/SALADBOWL**

AEONIUM ARBOREUM  
‘ZWARTKOP’

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** ⚡⚡⚡💧

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE ROSETTE SIZE:**

8 in (20 cm) wide

**PROPAGATION:**

Cuttings

## **ADDITIONAL NOTES**

Generally non-toxic to pets and people.

This tall dark red and green succulent turns almost black when grown in full sun.

This succulent is monocarpic, meaning it will die after blooming. When it does bloom, watch for yellow flowers.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/ZWARTKOP**

**AGAVE 'BLUE GLOW'**

**IDEAL LIGHT:** ☼ ☁

**WATER:** ♦♦○○○

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

24 in (61 cm) tall | 36 in (91 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Can be toxic to pets and people.

This succulent is monocarpic, meaning it will die after blooming. When it does bloom, watch for yellow flowers.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/BLUEGLOW**

**AGAVE MACROACANTHA  
“BLACK-SPINED AGAVE”**

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** ⚡⚡💧💧

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

24 in (61 cm) tall | 48 in (122 cm) wide

**PROPAGATION:**

Offsets, division

**ADDITIONAL NOTES**

Sap from leaves can be toxic to people and pets.

This succulent is monocarpic, meaning it will die after blooming. When it does bloom, watch for purple flowers. It can take nearly 15 years for “Black-Spined Agave” to mature enough to flower.

Water sparingly in the winter.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/BLACKSPINE**

**AGAVE PARRYI TRUNCATA**  
**“ARTICHOKE AGAVE”**

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** 🌦️💧💧

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

36 in (91 cm) tall | 48 in (122 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Can be toxic to pets and people.

This succulent is monocarpic, meaning it will die after blooming. It can take several years for 'Artichoke Agave' to mature enough to flower. When it does bloom, watch for yellow flowers in the summer.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/ARTICHOKE**

AGAVE VICTORIA-REGINAE  
“QUEEN VICTORIA AGAVE”

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** 🌦️

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

12 in (30.5 cm) tall | 18 in (46 cm) wide

**PROPAGATION:**

Offsets, seeds

## **ADDITIONAL NOTES**

Generally non-toxic to pets and people.

The leaves are green and thick, with white markings along the margins, giving each leaf a prism shape.

When it is mature, it produces off-white blossoms with purple hues.

‘Queen Victoria Agave’ is monocarpic.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/VICTORIA**

ALOE ARBORESCENSE  
“TORCH ALOE”

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** 🌦️

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

8 ft (2.4 m) tall | 8 ft (2.4 m) wide

**PROPAGATION:**

Stem cuttings, offsets, and seeds

**ADDITIONAL NOTES**

Generally non-toxic to pets and people.

This blue-green aloe has yellow “teeth” along the edges.

Watch for reddish orange flowers in the summer.

It is used medicinally as well as creating a “natural fence.”

Do not water in the summer.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/TORCH**

**ALOE 'BLACK BEAUTY'**

**IDEAL LIGHT:** ☀️ ☁️ 🌳 🏠

**WATER:** 💧💧💧

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

12 in (30.5 cm) tall | 12 in (30.5 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Can be toxic to pets and people.

This succulent has dark leaves, which can turn a deep purple when exposed to full sun.

Watch for coral-colored flowers in the spring.

The leaves are bumpy and stiff, similar to a Gasteria.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/BLACKBEAUTY**

ALOE BREVIFOLIA  
“SHORT-LEAVED ALOE”

**IDEAL LIGHT:** ☼ ☁

**WATER:** ⚡💧○○○

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

12 in (30 cm) tall | 12 in (30 cm) wide

**PROPAGATION:**

Offsets, seeds

**ADDITIONAL NOTES**

Can be toxic to people and pets

Leaves can turn red and yellow-ish in direct sun. “Short-leaved Aloe” is deer resistant.

Watch for orange-red flowers in the late spring.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/SHORT**

ALOE BUHRII  
“SPOTTED ALOE”

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** 🌦️

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

24 in (61 cm) tall | 36 in (91 cm) wide

**PROPAGATION:**

Offsets, seeds

**ADDITIONAL NOTES**

Generally non-toxic to pets and people.

Leaves turn red when grown in full sun.

Watch for yellow to orange flowers in the spring or fall.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/SPOTTEDALOE**

ALOE 'CHRISTMAS CAROL'

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** 🌦️

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

6 in (15 cm) tall | 6 in (15 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Generally non-toxic to people. Can be toxic to pets.

This small green and red succulent grows in the shape of a star, giving it its Christmas name. Yellow bumps run across the leaves, and a red color borders the edges. It turns more red when happily “stressed.”

‘Christmas Carol’ has red-pink flowers that typically bloom in the fall.

It is similar to Aloe ‘Doran Black’.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/CHRISTMASCAROL**

ALOE  
“CROSBY’S PROLIFIC”

**IDEAL LIGHT:** ☼ ☁

**WATER:** ⚡⚡💧💧

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

6 in (15 cm) tall | 24" (61 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Generally non-toxic to people. Can be toxic to pets.

This bright green succulent's long, tapered leaves turn pink when it's happily stressed.

Watch for orange flowers in the spring.

It is a hybrid of *Aloe nobilis* and an *Aloe humilis* var. *echinatum*. Sensitive to over-watering.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/CROSBYS**

ALOE 'DORAN BLACK'

**IDEAL LIGHT:** ☼ ☁ ☨ ☮

**WATER:** ⚡⚡💧💧

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

12 in (30.5 cm) tall | 8 in (20 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Generally non-toxic to people. Can be toxic to pets.

Periodically blooms with pink flowers.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/DORAN**

**ALOE FEROX**  
**“CAPE ALOE”**

**IDEAL LIGHT:** ☼ ☁

**WATER:** ⚡⚡💧💧

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

24 in (61 cm) tall | 36 in (91 cm) wide

**PROPAGATION:**

Offsets, seed

**ADDITIONAL NOTES**

Spines can cause irritation to people and pets.

Long green leaves turn red in full Summer sun.

Tall spikes with orange flowers can appear on mature plants in the Fall.

The leaves of young plants are fragile and tend to break off easily.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/CAPEALOE**

ALOE JUVENNA  
“TIGER TOOTH ALOE”

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** 🌦️ 🌦️

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

12 in (30.5 cm) tall | 24 in (61 cm) wide

**PROPAGATION:**

Offsets, seeds

**ADDITIONAL NOTES**

Generally non-toxic to people and pets.

Green leaves turn reddish-brown in full sun.

Watch for coral-colored flowers in  
the summer.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/TIGER**

ALOE NOBILIS  
“GOLD-TOOTH ALOE”

**IDEAL LIGHT:** ☼ ☁

**WATER:** 🌦️

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

24 in (61 cm) tall | 24 in (61 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Generally non-toxic to people and pets.

This Aloe has green leaves that can turn orange when stressed or in full sun.

Watch for red blooms in the summer.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/GOLDTOOTH**

# ALOE PERFOLIATA

## “MITRE ALOE”

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** 🌦️ ☀️ ☀️

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

12 in (30.5 cm) tall | 24 in (61 cm) wide

**PROPAGATION:**

Stem cuttings and seeds

**ADDITIONAL NOTES**

Can be toxic to people and pets.

The edges of this blue-green succulent turn reddish when grown in full sun.

Although most Aloes bloom in the winter, “Mitre Aloe” has red blooms in the Summer that attract hummingbirds.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/MITREALOE**

**ALOE PLICATILIS**  
**“FAN ALOE”**

**IDEAL LIGHT:** ☼

**WATER:** ♦♦○○○

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

8 ft (2.4 m) tall | 6 ft (1.8 m) wide

**PROPAGATION:**

Stem cuttings and seeds

**ADDITIONAL NOTES**

Generally non-toxic to people and pets.

Watch for red flowers in the Spring.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/FANALOE**

**ALOE POLYPHYLLA**  
**“SPIRAL ALOE”**

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** 🌦️💧

**MINIMUM TEMPERATURE:**

20°F (-1.1°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

12 in (30 cm) tall | 24 in (61 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Can be toxic to people and pets.

Watch for red flowers in the summer.

It is considered one of the most difficult succulents to grow. It does not do well in cold temperatures until it is mature.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/SPIRAL**

**ALOE “TWILIGHT ZONE”**

**IDEAL LIGHT:** ☼ ☁ ☨ ☮

**WATER:** 🌦️💧💦

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

12 in (30.5 cm) tall | 12 in (30.5 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Not generally toxic to people and pets.

This Aloe forms orange flowers at varying times when grown indoors or in temperate climates.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/TWILIGHT**

**ALOE VERA**  
**“MEDICINAL ALOE”**

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** 🌦️ 🌦️ 🌦️

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

24 in (61 cm) tall | 24 in (61 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Generally non-toxic to people. Can be toxic to pets.

When grown outdoors, watch for yellow-ish orange blossoms in the summer.

Indoor plants will not blossom.

Considered synonymous with *Aloe barbadensis*.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/ALOEVERA**

ANACAMPSEROS RUFESCENS

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** ⚡⚡💧

**MINIMUM TEMPERATURE:**

20°F (-6.7°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

24 in (61 cm) tall | 24 wide (61 cm) wide

**PROPAGATION:**

Stem cuttings and seeds

**ADDITIONAL NOTES**

Can be toxic to people and pets.

The tops of its leaves are dark green, while the underside is a deep purple color. The green gives way to red when it is happily stressed.

Watch for pink flowers that bloom in the spring.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/RUFESCENS**

ANACAMPSEROS  
TELEPHIASTRUM VARIEGATA  
“SUNRISE”

**IDEAL LIGHT:** ☁️ 🌳

**WATER:** ⚡⚡💧

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

6 in (15 cm) tall | 6 in (15 cm) wide

**PROPAGATION:**

Stem cuttings or seed

**ADDITIONAL NOTES**

Can be toxic to people and pets.

Watch for pink blossoms in the summer.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/SUNRISE**

**ARISTALOE ARISTATA**  
**“LACE ALOE”**

**IDEAL LIGHT:** ☀️ ☁️

**WATER:** 🌦️💧

**MINIMUM TEMPERATURE:**

10°F (-12.2°C)

**DORMANCY:**

Summer dormant

**MATURE PLANT SIZE:**

8 in (20 cm) tall | 6 in (15 cm) wide

**PROPAGATION:**

Offsets

## **ADDITIONAL NOTES**

Generally non-toxic to pets and people.

It has pink flowers that attract bees and hummingbirds.

Unlike some Aloes, this one is particularly fast growing.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/LACE**

# ASTROPHYTUM MYRIOSTIGMA

## “BISHOP’S HAT”

**IDEAL LIGHT:** ☼ ☁

**WATER:** ⚡⚡💧💧

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

3 ft (91 cm) tall | 8 in (20 cm) wide

**PROPAGATION:**

Seeds

## **ADDITIONAL NOTES**

Generally non-toxic to people and pets.

It produces sweet smelling yellow flowers in the summer after it reaches maturity.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/BISHOP**

**CEPHALOCEREUS SENILIS**  
**“OLD MAN CACTUS”**

**IDEAL LIGHT:** ☼

**WATER:** ♦♦○○○

**MINIMUM TEMPERATURE:**

30°F (-1.1°C)

**DORMANCY:**

Winter dormant

**MATURE PLANT SIZE:**

50 ft (15 m) tall | 18 in (46 cm) wide

**PROPAGATION:**

Seeds

## **ADDITIONAL NOTES**

Generally non-toxic to people and pets.

It can take 10 to 20 years to bloom, and produces red or yellow flowers that bloom at night during the summer.

Under the right conditions in the wild, “Old Man Cactus” can live to be 200 years old.

**FOR MORE DETAILS PLEASE VISIT:  
SUCCULENTSANDSUNSHINE.COM/OLDMAN**

CEREUS FORBESII MONSTROSE  
‘MING THING’

**IDEAL LIGHT:** ☼ ☁ ☨ ☮

**WATER:** ⚪ ⚫ ⚪ ⚪
